CSelect is a manufacturer of commercial furniture located in Henry County, Virginia.

CSelect concentrates on building fine Senior Housing seating and case goods. We also serve the Boutique Hotel and Country Club Markets. CSelect offers a range of the highest quality inline products; however, our flexible manufacturing techniques permit us to also offer custom fabrication.

CSelect is particularly sensitive to the finish material we use in DINING

How do our **FINISH** materials resist popular disinfectants?

	3 RAPID APPLICATIONS	1 HOUR SIT IN PLACE	24 HOURS SIT IN PLACE
Clorox	NO EFFECT	Slight but recovers	Creates a white film
Fantastik*	NO EFFECT	NO EFFECT	NO EFFECT
Lysol	NO EFFECT	NO EFFECT	NO EFFECT
Peroxide	NO EFFECT	NO EFFECT	NO EFFECT
Windex	NO EFFECT	NO EFFECT	NO EFFECT

Please feel free to use any of the above. Best protocol is to use any of them with a single application that is then removed with a clean damp cloth shortly thereafter.

CSelect's photography of wood finishes are not an exact replication of actual wood samples, but are very close. Actual wood samples are available upon request. Please contact your sales representative of our corporate office to request a sample. Please note production finish may vary slightly from samples due to the natural properties of wood, and how wood accepts finish material. Please contact your sales representative OR our corporate office.

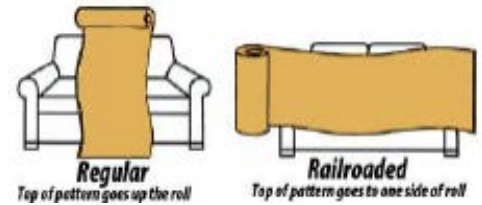

GENERAL CARE FOR UPHOLSTERY

STANDARD COMMERCIAL GRADE FABRICS

- Periodic light vacuuming and imbedded particle removal helps maintain cover material.
- Loose cushions should be turned and fluffed to prevent excessive wear.
- Prompt blotting up of spills with a dry cloth provides best result.
- Ordinary dirt and stains should be removed with a mild soap or shampoo and water, finish by rinsing that area with water and blot it dry.
- For Crypton & Vinyl follow the steps outline above, but where a persistent stain exists fashion a paste of equal

parts laundry detergent and water let sit for a minute or two, and then rinse with water and blot dry.

COM INFORMATION

What is Railroaded?

This feature allows reduction of seams and enables smoother furniture tailoring.

CSelect will use its best judgement in applying COM Fabric if specific instructions are not included with the order. We will not be responsible if the customer does not like the application of the fabric to the frame.

FULLY UPHOLSTERED SEATING SPECIFICATIONS

FRAME:

The frame construction consists of a combination of kiln dried hardwoods and hardwood plywood. Joint construction will consist of Butt Joints, Dado Joints and Dowel Joints, glued together with high-solids poly vinyl adhesive. Joints are reinforced with corner blocks and screws at critical stress areas. Corner blocks are also hardwood. Epoxy coated fasteners have a minimum penetration of 1 ¼". ¾" CDX plywood may be used in non-stress areas. Legs are tapered solid hardwood attached to inner frame structure with hardened sheet metal screws.

SEAT DECK:

The seat deck support system consist of 8 ga. Regular loop sinuous wire springs. Springs are attached to the frame using insulated clips stapled closed. There are two rows of insulated tie wires attached to each spring using insulated clips. Each sofa and loveseat will have double springs next to the arm to insure even uniform support. Springs will be separated from the seat cushion using a triple overlay consisting of a polyester non-woven fabric over the springs, polyester fiber deck pad and polyester flex deck denim (expanded vinyl deck when moisture protection option is ordered).

SEAT CUSHIONS:

Seat cushions are constructed with a 5 ½ - 1.8 pound density, 36 lb. Polyurethane core wrapped with a 1 ¼ oz Da-

cron with ticking. All "Bio-Flex" – (Earth Friendly) polyurethane filling materials are treated with flame retardant agents to meet Cal Technical Bulletin 117. Periodic reversing of cushions will insure uniform and even wear. Ottoman cushions are constructed with 5" – 1.5 pound density 36 ILD polyurethane core wrapped with 1 ¼ oz. Dacron with ticking.

INNER BACK:

The inside back construction consists of 11 ga. Sinuous – arc springs attached to the frame using insulated clips stapled closed. One row of insulated tie wire attached to each spring using insulated clips insures uniform support for the back padding materials. The padding material consists of 4 ¼" thick 1.8 pound medium density polyurethane foam. There is a non-woven polyester fabric overlay between the spring and polyurethane foam. All polyurethane filling materials meet Cal Technical Bulletin 117.

ARMS:

The arms are wrapped and the front arms stump is padded with 1.1 pound medium density polyurethane. Outside arms and outside back are covered with heavy duty .085 ga cardboard. All outside surfaces of the furniture are padded with .5 oz. of polyester padding so that all frame members and inner surfaces exposed to the backside of the fabrics are covered.

FUN FREIGHT FACTS

BLANKET WRAPPED: Primary product protection provided by blankets not cartons

BILL OF LADING: A commercial shipping document which serves three distinct purposes in connection with the carriage of goods. An itemized list of goods contained in a shipment. It represents the contract for carriage and serves as a document of title.

BLOCKING OR BRACING: Wood or metal supports used to keep shipments in place in or on trailers.

CLASSIFICATION (RATING): The class to which an article is assigned for the purpose of applying transportation charges.

COMMON CARRIERS: Those required to serve the general public on demand, at reasonable rates without discrimination.

CONCEALED LOSS OR DAMAGE: Loss or damage to the contents of a package which is not apparent until opened.

CONSIGNEE: The person or organization to whom a shipment is shipped.

CUBIC FOOT: 1,728 cubic inches. (H x W x D). $2 \times 2 \times 2 = 8$ cube ft

CUBIC CAPACITY: The carrying capacity of a truck according to measurement in cubic feet.

DETENTION: A charge made for a vehicle held by the shipper or consignee for loading or unloading or for forwarding directions or for any other purpose.

DOCK: The platform where trucks are loaded and unloaded.

FOB ORIGIN, FREIGHT PREPAID AND CHARGED BACK: The seller pays the shipment charge, but bills it to buyer, who owns the goods in transit and files any damage claim.

HIGH CUBE: Trailer body with above average cubic content.

HUNDRED WEIGHT: A statement of weight meaning 100 pounds, abbreviated CWT.

LTL (Less-than-Truckload): A quantity of shipment less than that required for the application of truckload rate.

MILEAGE RATE: Rates applied according to distance.

MULLEN TEST: A device to test the strength of fiberboard or similar material used as a substitute for wood in making shipping containers.

PACKING LIST: A detailed inventory of items contained in a shipment.

PALLET: A small wooden, paper or metal platform usually with top and bottom, on which packaged goods are placed to facilitate movement by some type of shipment handling equipment.

PRO: A number issued to each shipment by the carrier and used for computer tracking of the shipment to its destination.

PROOF OF DELIVERY (or P.O.D.): The delivery receipt copy of freight bill by receiver at time of delivery.

RULE OF THUMB 1: You can get 150 Seat cushion spaces on a truck when boxed Sofa=3 seat cushions, etc. More cushions when blanket wrapped vs. boxed.

RULE OF THUMB 2: 53 foot truck has approx 3300 cubic feet of space and 48 foot truck has approx 2800 cubic feet of space

SEAL: A device for fastening or locking the doors of a truck.

SHORTAGE: A deficiency in quantity shipped.

STRAIGHT TRUCK: Has both the power unit and shipment storage as one vehicle.

SURCHARGE: A charge above the usual or customary charge.

TERMINAL: A building for the handling and temporary storage of shipments pending transfer between locations.

TRUCKLOAD (TL): Quantity of shipments required to fill a truck. When used in connection with shipment rates, the quantity of shipments necessary to qualify shipment for a truckload rate.

FUN FURNITURE FACTS

APRON: Strip of wood adjoining the base of cabinets, seats and table tops extending between tops of legs or bracket feet.

ARMOIRE: A large movable cupboard or wardrobe, with doors and shelves for storing clothes.

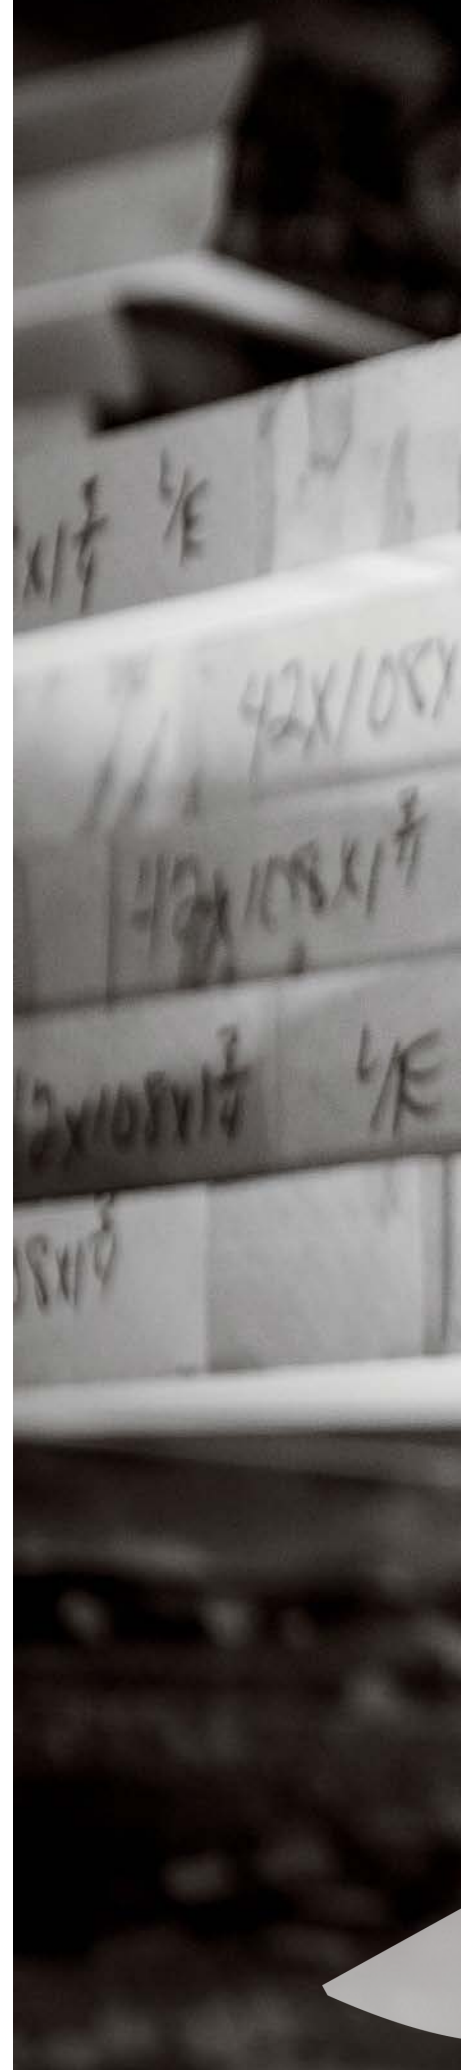

BAIL: Half-loop metal pull, usually brass, hanging from metal bolts. First used in America about 1700.

BALL FOOT: End of a turned leg, shaped round and with a hooded effect.

BANDING: Inlay or marquetry which produces a color or grain contrasting with the surface it decorates.

BEAD: A small, convex molding of a nearly semi-circular section.

BIRD'S EYE: A marking of small spots often found in the wood of the sugar maple. Used and much prized for the earliest to present times.

BLOCK FOOT: Square, vertical foot at base of any straight, uptapered leg.

BOMBE: (French): An outward swelling. Applies to commodes, bureaux, armoires.

BOULLE: Celebrated designer of the Louis XIV period noted for his inlay of metals and tortoise shell. "Boullework" is a descriptive phrase.

BOWFRONT: A front that curves outward to appear convex.

BURL: A tree knot or protruding growth which shows beautifully patterned grainings when sliced. Used for inlay or veneer.

CABRIOLE: A type of leg which swells outward at the knee and inward at the ankle.

CASE GOODS: Pieces made largely, but not wholly, of wood and having certain storage facilities.

CLAW AND BALL: Foot of carved animal or bird claw clutching a ball, generally terminating a cabriole leg.

COFFEE TABLE: Long, low table used in front of a sofa.

DENTILS: A classic, decorated design consisting of rectangular blocks with spaces between.

DOWEL: Headless pin, usually made of wood, used in the construction of furniture.

DRUM TABLE: A circular top table on a tripod base with a deep skirt that may contain drawers.

EGG AND DART: A classic design, consisting of alternating eggs and darts, used mostly in cornices.

ESCUTCHEON: Name applied to a shield upon which a coat of arms or other devices are emblazoned.

FINIAL: A decorative finishing device, usually foliated, for the terminals of projecting uprights.

FLUTING: A grooving on any horizontal or perpendicular surface.

HIGHBOY: A high chest of drawers, deriving its name from haut bois, which in French means "high wood."

HUTCH: Enclosed structure, often raised on uprights, or an enclosed structure of more than one tier.

INLAY: A design of contrasting woods, ivory, or other materials, set into a surface.

KD (KNOCKED DOWN): Applied to pieces shipped unassembled or only partially assembled.

LOVE SEAT: A small sofa or sofa sleeper designed to accommodate two persons.

LOWBOY: A table with drawers and in most cases, relatively short legs.

MOLDING: Ornamented or shaped strips, either sunk into or projecting from a surface. Used mostly for decoration.

OCCASIONAL TABLE: A term applied loosely to any small table.

OGEE: A compound curve, the directions of which are opposite to those of the Cyma curve.

OTTOMAN: Low upholstered seat, without arms or back, used as a footstool.

OXBOW, OXBOW FRONT: The reverse serpentine curve, somewhat resembling the curve of an oxbow. Often used in the finest 18th Century New England case furniture such as chests of drawers, secretaries, etc.

PATINA: A surface texture produced by age, wear or rubbing.

PEDESTAL TABLE: A table on a round center support

PEDIMENT: The space or structure above a cornice. The classic pediment, seen in the conventional Greek temple, was triangular in shape. It is found on the tops of secretaries and grandfather's clocks, usually as a "broken pediment."

PLINTH: Square or octagonal base of a chest or other column, solid to the floor.

RECESSED BACK: Room is provided to run conduit along wall behind furniture piece.

SERPENTINE FRONT: Front of a commode, desk or bureau shaped in a waving curve.

STRETCHER: The underbracing of chairs and tables taking an "H" or "X" form.

SUITE: A complete set of matched furniture.

TAPER LEG: A leg which diminishes in thickness as it approaches the foot.

TURNING: The shaping of legs or trim obtained by using a lathe. It is one of the most venerable wood working processes.

veneer: Thin sheets of wood applied to the surface for decorative effect or to improve the appearance of furniture.

WARDROBES: The wardrobe developed out of the cupboard and the cabinet in the late 17th Century. It consists of a straight, upright cupboard closed by two doors and with one or more shelves on the undecorated interior.

X-STRETCHER: A crossed stretcher at the bottom of a chair or table.

GENERAL WARRANTY

Disclaimers & Terms

24 MONTH WARRANTY

CSelect and Bassett Mercantile warrant their products to be free of defects in material and workmanship under normal use and service for a period of twenty four months from the date of invoice.

During this time period, CSelect and Bassett Mercantile will repair or replace, at its discretion, any product that proves to be defective. The products are sold only with such warranty as is expressly provided for in the preceding paragraph and no other warranties apply, expressed or implied. CSelect and Bassett Mercantile expressly exclude any warranty of merchantability or fitness for a particular purpose. CSelect and Bassett Mercantile shall not be responsible for incidental or consequential damages with respect to products sold hereunder.

WARRANTY DISCLAIMERS

Our warranty does not apply to any item, which is damaged due to misuse, negligence, alteration, abuse, or accident.

WARRANTY SERVICE

In the event service is required under the CSelect and Bassett Mercantile warranty, please contact the following: CSelect, 195 Clyde Prillaman, Fieldale, VA 24089, Phone: (276) 632-9107, Fax: (276) 632-9138

FREIGHT CLAIMS

CSelect and Bassett Mercantile's responsibilities for all merchandise ceases when the carrier receives shipments. All shipments should be opened and inspected as soon as they are received. If damage is found, the merchandise should be refused and returned to the carrier for repair or replacement at the

carrier's expense. If concealed damage is found, the carrier should be telephoned to expedite a "Consignee Concealed Damage Claim Form", which is to be filed with the carrier.

ADDITIONAL DISCLAIMERS

CSelect and Bassett Mercantile reserve the right to delete items or styles without notice. The line art, catalog photography and descriptions are based on construction techniques available at the time of publication. All dimensions listed are approximate and will vary due to the nature of wood. Standard industry variations for upholstery are +/- 1" with weight variation of 1 to 2 pounds. CSelect and Bassett Mercantile reserve the right to incorporate new methods and materials without prior notice. Warranty does not apply to cover fabric nor to the foam. CSelect and Bassett Mercantile also reserves the right to alter dimensions.

TERMS

50% deposit required with every order, balance due (30) thirty days from shipment of goods. Goods are made to order, no cancellations will be accepted. All orders subject to warehousing/storage charges if original requested ship date is altered by more than 30 days.

UPHOLSTERY FINISHES

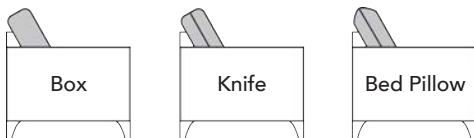

NAILHEADS

Bassett's photography of wood finishes are not an exact replication of actual wood samples, but are very close. Actual wood samples are available upon request. Please contact your sales representative of our corporate office to request a sample. Please note production finish may vary slightly from samples due to the natural properties of wood, and how wood accepts finish material. Please contact your sales representative OR our corporate office.

UPHOLSTERY OPTIONS

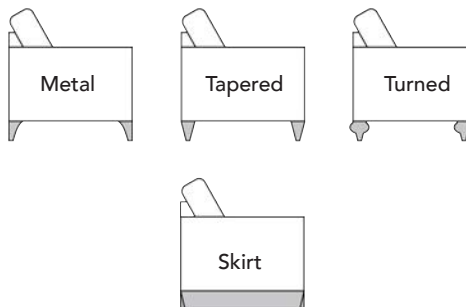

3 BACKS

BACK CUSHION COMFORT OPTIONS:

- Loose Back
- Standard Fill
- Semi-attached Back
- Down blend Fill

4 BASES

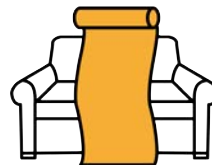

GENERAL CARE FOR UPHOLSTERY

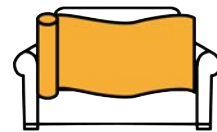

STANDARD COMMERCIAL GRADE FABRICS

- Periodic light vacuuming and imbedded particle removal helps maintain cover material.
- Loose cushions should be turned and fluffed to prevent excessive wear.
- Prompt blotting up of spills with a dry cloth provides best result.
- Ordinary dirt and stains should be removed with a mild soap or shampoo and water, finish by rinsing that area with water and blot it dry.
- For Crypton & Vinyl follow the steps outline above, but where a persistent stain exists fashion a paste of equal

parts laundry detergent and water let sit for a minute or two, and then rinse with water and blot dry.

COM INFORMATION

What is Railroaded?

This feature allows reduction of seams and enables smoother furniture tailoring.

CSelect will use its best judgement in applying COM Fabric if specific instructions are not included with the order. We will not be responsible if the customer does not like the application of the fabric to the frame.

FULLY UPHOLSTERED SEATING SPECIFICATIONS

FRAME:

The frame construction consists of a combination of kiln dried hardwoods and hardwood plywood. Joint construction will consist of Butt Joints, Dado Joints and Dowel Joints, glued together with high-solids poly vinyl adhesive. Joints are reinforced with corner blocks and screws at critical stress areas. Corner blocks are also hardwood. Epoxy coated fasteners have a minimum penetration of 1 1/4". 3/4" CDX plywood may be used in non-stress areas. Legs are tapered solid hardwood attached to inner frame structure with hardened sheet metal screws.

SEAT DECK:

The seat deck support system consist of 8 ga. Regular loop sinuous wire springs. Springs are attached to the frame using insulated clips stapled closed. There are two rows of insulated tie wires attached to each spring using insulated clips. Each sofa and loveseat will have double springs next to the arm to insure even uniform support. Springs will be separated from the seat cushion using a triple overlay consisting of a polyester non-woven fabric over the springs, polyester fiber deck pad and polyester flex deck denim (expanded vinyl deck when moisture protection option is ordered).

SEAT CUSHIONS:

Seat cushions are constructed with a 5 1/2 - 1.8 pound density, 36 lb. Polyurethane core wrapped with a 1 1/4 oz Da-

cron with ticking. All "Bio-Flex" – (Earth Friendly) polyurethane filling materials are treated with flame retardant agents to meet Cal Technical Bulletin 117. Periodic reversing of cushions will insure uniform and even wear. Ottoman cushions are constructed with 5" – 1.5 pound density 36 ILD polyurethane core wrapped with 1 1/4 oz. Dacron with ticking.

INNER BACK:

The inside back construction consists of 11 ga. Sinuous – arc springs attached to the frame using insulated clips stapled closed. One row of insulated tie wire attached to each spring using insulated clips insures uniform support for the back padding materials. The padding material consists of 4 1/4" thick 1.8 pound medium density polyurethane foam. There is a non-woven polyester fabric overlay between the spring and polyurethane foam. All polyurethane filling materials meet Cal Technical Bulletin 117.

ARMS:

The arms are wrapped and the front arms stump is padded with 1.1 pound medium density polyurethane. Outside arms and outside back are covered with heavy duty .085 ga cardboard. All outside surfaces of the furniture are padded with .5 oz. of polyester padding so that all frame members and inner surfaces exposed to the backside of the fabrics are covered.
