"SO LET US BE GOOD STEWARDS"

Things are changing at CSelect. We are ever more aware of how we impact the environment. Customers and Manufacturers alike have a role to play in preserving this Earth's fragile ecosystem and precious resources. CSelect will be seeking opportunities to develop methods of manufacturing that minimize any negative impact on the environment while continuing to ensure that our customers receive a quality product.

Actions Thus Far:

*90% of our lumber usage is FSC Certified

*Recently the wood seating plant began to exclusively use **WATER** base stain/sealer/and top coat to finish our wood seating. We are one of only a very few **North American** manufacturers doing so.

*Upwards of 66% of all CSelect shipments leave blanket wrapped. Therefore, significantly less corrugated material is required. Blanket wrapping shipments helps us better yield/load our trucks. CSelect uses comparatively fewer trucks than other manufacturers.

CSelect's OBJECTIVE IS TO HAVE A GREENER FUTURE

All rails and blocks are grooved and finger jointed together. Special formulated glue for Beechwood is used to bond this process so it does not become brittle over time.

All chairs are assembled with mortis and tenons to give superior strength.

CSelect chair parts are manufactured in Italy out of the highest quality, kiln dried Beechwood which gives them superior strength and a smooth consistent finish. All chairs are assembled in North America with specially designed hydraulic presses to ensure consistent pressure is applied while squaring the chair everytime.
